

Ticket ID	Alert Message	Severity	Details	Ticket status
A-2703	SERVER-MAIL Phishing attempt possible download of malware	Medium	The user may have opened a malicious email and opened attachments or clicked links.	Escalated

Ticket comments
The alert is detected as the file is malicious because there are spelling mistakes in the email which may be a sign of it coming from an untrusted source. Also there is a mismatch between the sender's name and his email id. The VirusTotal indicates this file as malicious. With these findings I choose to escalate this ticket to SOC two analyst to take further action.
